Ahsan Rafiq Hussain

SENIOR DATABASE ADMINISTRATOR | DATABASE ENGINEER | ARCHITECTURE FOCUS

Karachi, Pakistan | +92 322 224 9078 | ahsanghanchi@hotmail.com | Linkedin | Portfolio

PROFESSIONAL SUMMARY

Senior Database Administrator and database engineer with 10+ years of experience supporting MySQL, PostgreSQL, and MongoDB across telecom, financial services, IoT, and e-commerce. Combines hands-on operations with architecture-focused design for high-availability, cloud, and high-transaction environments. Supported database platforms serving 700+ clients and delivered measurable improvements including 50% shorter backup windows, 30% faster response times, and disaster-recovery failover reduced from hours to minutes.

TECHNICAL SKILLS

Database platforms: MySQL, PostgreSQL, MongoDB, MariaDB, InfluxDB

Architecture and operations: High availability, replication, InnoDB Cluster, partitioning, sharding, schema and query optimization, performance tuning, capacity planning

Backup, recovery and security: Backup and restore, disaster recovery, failover, encryption, audit logging, access control, compliance

Cloud platforms: GCP (Compute Engine, BigQuery, Cloud Storage), AWS (EC2, RDS, S3, Lambda, VPC, IAM), Azure (Virtual Machines, Azure SQL, Blob Storage), OCI

Automation and monitoring: Python, Bash, Ansible, ETL, Percona Monitoring and Management (PMM)

PROFESSIONAL EXPERIENCE

Senior Database Administrator

Sibisoft (A NorthStar Company) | USA / Remote | Oct 2021 - Present

- Operate MySQL database environments supporting 700+ clients across on-premises and cloud deployments, with responsibility for availability and performance.
- Led migration of client databases to GCP, replacing third-party managed services with in-house architecture and reducing operating costs by 20%.
- Automated backup and disaster-recovery workflows, cutting backup windows by 50% and supporting zero-data-loss failover.
- Optimized queries and indexing for high-volume transactional systems, improving response times by 30%.
- Used Percona Monitoring and Management to identify and resolve 100+ critical database incidents while sustaining 100% uptime during peak periods.

Database Administrator / Consultant

Al Rajhi Takaful | Riyadh, Saudi Arabia / Remote consultancy | Jan 2024 - Apr 2024

- Provided remote DBA consulting for regulated financial-services workloads, optimizing high-volume transaction queries and developing compliant backup and recovery strategies.
- Redesigned disaster-recovery procedures, reducing failover time from hours to minutes.

Database Administrator / Senior Database Developer

Conure IT Services | USA / Remote | Jan 2017 - Sep 2021

- Designed and led deployment of a 4TB MySQL cluster for a big-data application, improving query performance by 40% through schema and query redesign.
- Built a hybrid MySQL/MongoDB architecture for IoT workloads, supporting real-time sensor data alongside transactional records.
- Optimized complex SQL, including Common Table Expressions (CTEs), and automated ETL workflows, reducing processing time by 25%.
- Improved reporting efficiency by 35% through database optimization in a high-transaction environment.

Data Analyst / ERP Consultant

e-Blue Systems | Dubai, UAE | Jan 2012 - Dec 2016

- Configured and deployed ERP systems, delivering customizations and add-ons across 30 client implementations.
- Integrated data from 4 source systems into stakeholder-ready reports, reducing preparation time by 80%.

EDUCATION

Master of Computer Science (MCS) | PAF-Karachi Institute of Economics & Technology (KIET), Karachi | 2017

CERTIFICATIONS AND PROFESSIONAL LEARNING

- Database Structures and Management with MySQL | Coursera / Meta | 2022
- Advanced MySQL Topics | Coursera / Meta | 2023

ADDITIONAL BACKGROUND

Finance and accounting knowledge with PIPFA background, complementing database work in financial-services environments.
